Arsenij Schützer

Fullstack Developer

Address: Königsberger Str. 4B, 75181 Pforzheim, Germany
Born: 08.10.1992 in Omsk, Russia
Phone: +49 162 629 1630
E-Mail: senyaarseniymail@gmail.com
Web: senyaak.work · github.com/senyaak · linkedin.com/in/senyaak

Profile

Fullstack developer with 8 years of professional experience. Entered the field through a self-initiated distance study programme in computer science (ils.de, 2014/15) followed by a three-year apprenticeship as an IT Specialist for Application Development (Fachinformatiker Anwendungsentwicklung, 2015–2018). Focus: Angular, Vue, TypeScript, Node.js, Java, PostgreSQL. Experienced in delivering complete applications on my own (frontend, backend, database and architecture) as well as in cross-functional teams. Native Russian speaker.

Technical Skills

Core stack	Angular (every version since AngularJS), Vue 3, TypeScript/JavaScript, Node.js, Java, PostgreSQL, MongoDB
Experienced	React, NestJS, Spring Boot, Python (FastAPI, Kedro), Linux, Git, Docker, WebSocket, REST APIs, JSON Schema, AI tools (Claude Code, Copilot, own MCP servers)
Further experience	Kotlin, C, C++, C#, PHP, Rust, Unity, Jenkins, Kubernetes, Argo CD, Helm, Kustomize, Prometheus, Grafana, Socket.IO

Professional Experience

e.telligent GmbH, Regensburg, Germany
09/2023 – present

Fullstack Developer

e.telligent builds software solutions for electrified mobility. Working on e.CoSys, an ASPICE-compliant application lifecycle management platform for automotive development with end-to-end traceability along the V-model.

- Fullstack development across the entire stack: **Vue 3 + TypeScript** on the frontend, **Java** with **PostgreSQL** on the backend
- Design and implementation of customer-specific features on a generic, licensable platform architecture
- Independent development of complex frontend components
- Backend development with a focus on complex data structures
- Code reviews and refinement sessions within the team
- AI service wrapper in Python

Mittwald CM Service GmbH & Co. KG, Espelkamp, Germany
07/2022 – 12/2022

Fullstack Developer

Mittwald is an established German web hosting provider. Worked on the customer-facing portal as part of a larger development team.

- Frontend development of the customer portal with **React** and **TypeScript**
- Agile team with established code standards and CI/CD processes

saltation GmbH & Co. KG, Bielefeld, Germany
08/2018 – 01/2022

Fullstack Developer

saltation develops custom software solutions for various industries (20–40 employees). Delivered several projects on my own from frontend to database, in some cases as a tandem (solo frontend with a solo backend developer).

- Content management system for object data (harbours, bicycles): generic models from JSON Schema with automatic form generation via JSON Form configuration. Stack: **AngularJS, Node.js, PostgreSQL**; sole responsibility over several years
- Architectural extension of the CMS with internationalisation (parallel multilingual content): coordinated changes to database, backend and frontend
- Business process modelling system (training, further education): **AngularJS** with a custom engine, several frontend variants
- Administration tool for equipment rental: **Angular** (version 2 onwards)
- Onboarding app for tablets in **Unity (C#)**
- Occasional backend work in **Rust** (server-side changes) and smaller projects in Java and C#

saltation GmbH & Co. KG, Bielefeld, Germany 08/2015 – 07/2018
Apprenticeship: IT Specialist, Application Development (IHK)

- Final project: design and full implementation of the internationalisation extension for an existing CMS (database, backend, frontend; solo project)
- Hands-on experience in several web projects with AngularJS, Node.js, PostgreSQL

Notable Personal Projects

- **VTT (Virtual Tabletop):** own virtual tabletop system for pen-and-paper role-playing games (comparable to Foundry/Roll20). Node.js + WebSocket backend (server as single source of truth), canvas renderer, zone/surface mechanics, JSON-based rule definitions
- **Comersant, multiplayer board game:** long-running personal project (Monopoly-like online board game) with Angular, Node.js, WebSocket. Architecture decisions documented as ADRs
- **hochstrasser-immobilien.de:** pro bono website including SEO-optimised German content for a real estate agent in Ulm/Neu-Ulm
- **senyaak.work:** personal website, multilingual (DE/EN/RU)

Languages

Russian	native
German	business fluent (C1), living in Germany since 2009; apprenticeship and entire career in German
English	very good, written and spoken (B2/C1), regular reading of technical and general content

Training

08/2015 – 07/2018	**IT Specialist, Application Development (Fachinformatiker Anwendungsentwicklung, IHK)** saltation GmbH & Co. KG, Bielefeld, Germany
02/2014 – 04/2015	**Distance learning in Computer Science** ils.de

Education

09/2013 – 06/2015	**CJD Gymnasium** Versmold, Germany
09/2011 – 06/2013	**Realschule diploma, Akademie Klausenhof** Rhede, Germany
09/2009 – 06/2011	**Hauptschule diploma, WRSD am Deutenberg** VS-Schwenningen, Germany
09/2001 – 06/2008	**General Secondary School No. 14** Omsk, Russia
